### ABSTRACT

Alcohol is a psychoactive and toxic substance which consists with dependence creating properties. Alcoholism has listed as one of the three most deadly killer diseases of the 20th century by World Health Organization. According to Ayurveda, Madatyaya is a disease which is characterized by various conditions related to excessive and improper alcohol drinking. Alcohol will affect as an inebriant and contributes to 3 million mortalities each year globally with many more morbidities. Ayurveda has mentioned about the concept of *Dinacharya* (daily routine) which denotes the whole range of activities, attitudes of every day from sunrise to sunset which leads to positive health. Thus the objectives of this study were to study on Madatyaya with special reference to Alcoholism and applicability of concept of *Dinacharya* (Daily routine) to maintain healthy life styles of patients of Madatyaya and their morbidities with special reference to Alcoholism. The literature data were gathered by Ayurvedic authentic text books, Medical books, previous published Journals and authentic web sites. According to Charaka Samhita it has mentioned about the origin of Madatyaya as Vataja, Pittaja, Kaphaja and Sannipataja. Considering on gathered data, it can be concluded that signs, symptoms and complications mentioned in both

modern and Ayurveda systems are correlated to each and applying the concept under *Dinacharya* as getting up in *Brahmamuhurtha*, *Ushapana* (Intake of water in early morning), *Sauchakarma* (Voidings of excrements), *Dantadhavana* (cleaning of teeth), *Jivhanirlekhana* (cleaning of tongue), *Anjana* (application of collyrium), *Nasya* (nasal cleansing), *Gandusha*, *Kavala* (mouth gargles), *Abhyanga* (Massage), *Snana* (*Bath*), *Vyayama* (Exercise), *Udvarthana* (exfoliation) and *Ahara* (diet) gives positive effect on managing morbidities occurred due to Alcoholism.

Keywords: Alcoholism; Daily routine; Dinacharya; Madatyaya.

### 1. BACKGROUND

Alcohol is a psychoactive and toxic substance consists with dependence creating which properties. Alcoholism is a health issue in the world which can harm the society as well as the individuals. Alcoholism has listed as one of the three most deadly killer diseases of the 20th century by World Health Organization (WHO).[1] Having alcohol will affect as an inebriant and alcohol consumption contributes to 3 million mortalities each year globally as well as many more morbidities especially in low socioeconomic backgrounds. Overall use of alcohol is responsible for 5.1% of the worlwide burden of diseases [1].

According to Ayurveda, Alcoholism can be correlated with Madatyaya; which is characterized by various conditions related to excessive and improper alcoholic beverages. Madatyaya includes tridoshas and it vitiated Rasa and Rakta dhatu. Rasavaha, Raktavaha, Sangyavaha Shrotas are vitiated in Madatyaya. Hridaya (Heart) is the main adhisthan (seat) and it affects the ojas in the body. Finally it leads to Ojakshaya (Reducing immunity), Dhatukshaya (Diminishing body tissues), Sharirkampa (Tremors in the body), Pralapa (Delirium), Agni Vikara(Metabolic Bhrama (Tremors), defects) and Anidra (Insomnia) in alcoholic individual.

There are three main treaties in Ayurveda called vruhatraya; Charaka Samhita, Susrutha Samhita and Ashthanga Hridaya Samhita According to Charaka Samhita it has mentioned about the origin of Madatyaya as Vataja, pittaja, kaphaja and Sannipataja [2] and Sushrutha Samhitha [3] has mentioned the Panathya, Panajeerna, Paramada and Panavibharama in Panatyayapratishedha.

Ethyl alcohol depresses the CNS and acts as harmful addicted substance and effect on vital body part. 80 % percent alcohol absorbed in small intestine and metabolizes in liver and thus lead to damage the liver due to alcoholism. Alcohol is CNS depressant that acts on receptor for  $\gamma$ -aminobutyric acid (GABA) the main inhibitory neurotransmitter in the nervous system. Cognitive, behavioral and psychomotor changes can emerge at blood alcohol level as low as 0.02-0.03 g/dl [4].

Dinacharya or daily routine denotes the way people live and reflecting the whole range of activities, attitudes of every day from sunrise to Importance of aettina sunset. qu in Brahmamuhurtha, Ushapana (Intake of water in early morning), Sauchakarma (Voidings of excrements). Importance of squatting in toilets. (cleaning Dantadhavana of teeth). Jivhanirlekhana (cleaning of tongue), Anjana (application of collyrium), Nasva (nasal cleansing), Gandusha ,Kavala (mouth gargles), Abhyanga (Massage), Snana (Bath), Vyayama (Exercise), Udvarthana, Ahara (diet) concepts are need to be implicated for positive health to manage morbidities due to alcoholism and Madatyaya [5].

### 1.1 Objective

To study *Madatyaya* and its complications with special reference to Alcoholism.

To study the applicability of concept of *Dinacharya* (Daily routine) to maintain healthy life styles of patients of Madatyaya and their morbidities with special reference to Alcoholism.

### 2. MATERIALS AND METHODOLOGY

The literature data was gathered from Ayurvedic authentic text books, Medical books, previous Journals and web sites. The gathered data were analyzed according to the study.

### 3. RESULTS

## 3.1 Ayurveda Emphasized that the Complications of Madatyaya as

*Hikka* (Hiccup), J*war*a(Fever), *Vamath*u(Vomitting), *Vepathu(*Tremors), *Parshwashoola*(Pain in flanks), *Kasa*(Cough) and *Bhrama*(Giddiness) [10].

# 3.2 The Common Clinical Syndromes Associated with Chronic Alcoholism According to Modern Science are

Delirium tremens, Alcoholic hallucinosis, Korsakoff's psychosis, Wernicke's encephalopathy, Marchiafava-Bignami syndrome, Alcoholic paranoia and Alcoholic seizures<sup>[11]</sup>.

## Table 1. Causative factors and signs and symptoms of each madatyaya types according to Ayurveda

Type of Madatyaya	Causative factors	Signs and symptoms
Vatika Madatyaya [2]	If a person is excessively emaciated due to <i>Krodha</i> (Anger) , <i>Shoka</i> (grief), <i>Bhaya</i> (Fear), <i>Vyavaya</i> (sexual-intercourse), <i>Chankramana</i> (walking), <i>Sahasa</i> (Stress), eating <i>Ruksha</i> (dry), less or limited quantity of food, drinks excessively fermented <i>Madya</i> at night lead to the impairment of <i>Nidra</i>	Hikka(Hiccup) Shwasa(Asthma), Shirah Kampa(Tremors in head) Parshva Shula(pain in flanks) Prajagara(Insomnia) Bahupralapa(Delirium)
Pittaja Madatyaya [6]	If a person, indulging in food that is Amla(Sour), Ushna(hot) and Teekshna(Sharp), having wrathful disposition and excessive exposure to the fire and sun, drinks excess quantity of Teekshna, Ushna and Amla Madya	Trishŋa(Thirst), Daaha(Burning Sensation) Jvara(Fever) Sweda(Sweating) MoorchaFainting) Atisara(Diarrhohea) Vibhrama(Giddiness) Haritavarna(Greenish complesion)
Kaphaja Madatyaya [7]	If a person who is habituated to Madhura(Sweet), Snigdha(Uncotous) and Guru(Heavy) Ahara, does not perform Vyayam(Exercise), who takes Diwaswapna(Day sleep) and Sukhaseenata, excessively drinks Madya which is not an old one or which is prepared of Guda(Jaggery), and Paishtika(Cereals)	Chardi(Vomiting) Aruchi(Anorexia) Hrillasa(Nausea) Tandra(Drowsiness) Staimitya(Stiffness) Gaurava.(Heaviness)
Sannipataja Madatyaya [8]	Combination of above mentioned all causative factors	Shareeradukham(Physical distress) Balavatsammoha(Mental confusion) Hridayavyatha(Cardiac pain) Aruchi(Anorexia) Pratata Trishna(Continous thirst) Jwara(Fever)

Sheetoshnalakshana(Hot and
clod features)
Shirokampa(Tremors of
head),
Jrumbha(Yawning)
Sphuranam(Twitching)
Veepanam(Tremor)
Shrama(Stiffness)
Urovibandha, (Diaturbance in
Thorax)
Kasa(Cough)
Hikka(Hiccup)
Shwasa(Asthma)
Prajagara,(Insomnia)
Shareera Kampa(Body
Tremors)
, Karnakshimukharoga(Dieases
in eye ears and mouth)
<i>Trikagraha</i> (Pain in coccyx
area)
<i>Ch</i> hardi(Vomiting)
Atisara(Diarrhea)
Hrulasa(Nausea)
Bhrama(Gidiness)
Pralapa(Delirium)

Stage	Signs and Symptoms
Stage of Excitement	Person will be euphoric (sense of well-being). Speech
(Blood alcohol level: 50-150 mg%)	actions, and emotions are less restrained.
	He cannot keep secrets
	Lowering of visual acuity.
	Nystagmus
	Less mental concentration
	Less judgment
	Attention and recall deteriorates
Stage of In-coordination (Blood alcohol level: 150-250 mg%)	Due to further depression of higher centres, the persor may be irritable.
(g,v)	Perception and skilled movement centers are involved
	Incoordination of fine movements
	Alterations in speech
	Alteration in fine finger movements.
	Nausea and vomiting.
	Flushed Face
	Rapid Pulse
	Diminishing touch, taste, smell and hearing
	Hypothermia.
	Breath smells of alcohol.
	Pupils are dilated
	Sluggish in reacting to light.
Stage of Coma	Slurred speech.
(Blood alcohol level > 250 mg	Coordination is markedly affected and becomes giddy
· · · · · · · · · · · · · · · · · · ·	and fall.
	Rapid Pulse.
	Hypothermia.
	Pupils are contracted,

### Table 2. Signs and symptoms of stages in acute alcohol poisoning [9]

Type of Dinacharya [5]	Benefits for the individual according to Ayurveda	Applicability of Dinacharya in managing morbidities of Madatyaya & Alcoholism
Brhmmuhrthe Uththishteth	Brahmamuhurtha is the second last muhurta before sunrise or 96 minutes before sunrise. Calm and quite environment and	People who wake up early tend to go to bed earlier and enjoy longer, better quality sleep to avoid insomnia, mental confusion and distress due to Madatyaya. Further
	ideal time for grasp knowledge. Environment pollution is low and air is clean.	improve mood and better concentration Photosynthesis in plant kingdom is high and oxygen which easily mixes with haemoglobin forming and oxyhaemoglobin reaching to the remote tissues and cause to boost the immune system
Ushapana	Drink a glass of lukewarm or normal temperature water after waking up.	Drink water in early Morning causes to avoid Arsha (Haemorrhoids), Sotha (oedema), Grahani (Sprue), Jwara (fever), Jara (old age), Kustha (skin disorder), Medo vikara (Obesity related disease) and live long.
Sauchakrama	Voiding the excretory products in the morning	Relieving from the natural urge or perform excretory functions early in the morning prolongs life. Suppress of natural urges increase the Vata dosa and increase the conditions of tremors, delirium, pain in flanks and giddiness.
Dantadhavana	Cleaning of teeth	Twigs of kashaya(Astringent), katu(Pungent) and tikta(Bitter) rasa dominant trees are advisable to use in cleaning teeth and it leads to decrees the anorexic conditions
Jihva Nirlekhana	Tongue Scraping	Remove the coating , increase the oral hygiene and increase taste sensation by avoiding anorexic conditions
Anjana	Application of collyrium	It helps to increase vision and removes the eye diseases in Madatyaya
Nasya	Nasal Cleansing	Nose is believed as the entry of the head and cleanse all the diseases above clavicle. Indicated for daily use in one or two drops especially strengthens the sense organ, improves health of the hairs, shin and

### Table 3. Applicability of dinacharya

Type of Dinacharya [5]	Benefits for the individual according to Ayurveda	Applicability of Dinacharya in managing morbidities of Madatyaya & Alcoholism
Gandusha & Kavala	Filling the mouth with some medicated fluid and retaining for some time or gargling	Enhances the senses and removes anorexia
Abhyanga	Oil Massaging	Decreases the stiffness, tremors and mental confusions
Vyayama	Regular exercises	vyayama helps to physical development luster and increase the hunger by decreasing physical debility,heaviness of the body. Provide compactness of body parts and optimum immunity
Udvarthana	Rubbing of the body by medicated powders	It removes sharira dourgandhya (body odour), Gurutva (heaviness), Tandra (drowsiness), Kandu (itching), Arochaka (anorexia) and Sweda (sweating)
Ahara	Healthy and balanced diet	It gives physical fitness and provide energy and immunity. According Ayurveda no medicine can be equated with food and gives the intellectual power and strength.

#### 4. DISCUSSION

Disease which has mentioned in Ayurveds as *Madatyaya* is emerged due to excessive consumption of alcoholic beverages. Considering the signs and symptoms of the *Madatyaya* with Alcoholic intoxication according to Modern Science, it is revealed that both concepts can be correlated with each other.

Alcohols are inebriants which affects to the Central Nervous System and it is highlighted that most of the signs and symptoms which shows in the Madatyaya related with the Central Nervous System. According to Modern medicine complications as Delirium tremens is an acute organic brain syndrome which shows psychomotor agitation with mental confusions Wernicke syndrome or Wernicke and encephalopathy, is due to thiamine deficiency and is characterized by the triad of ataxia, oculomotor abnormalities and confusion [12]. Alcoholic hallucination is characterized by the state of hallucination, mainly auditory with systematized delusions of persecution. Further,

the Korsacoff's Psychosis is organic amnestic syndrome. Thus, considering the signs and symptoms of each type of *Madatyaya* with stages of Alcohol intoxication, that first stage can be correlated with *Vataja Madatyaya*, second stage with *Pittaja* and *Kaphaja Madatyaya* and third stage with *Sannipataja Madatyaya* respectively. Moreover the complications and *Sannipataja Madatyaya* mentioned by the Ayurveda also related with the physical and mental confusion conditions which harms the person.

Thus the managing these morbidities through Ayurveda concepts will be an effective influence to reduce the burden to socioeconomical environment. Importance of getting up in Brahmamuhurtha has been proved by the researches as an older age, male gender, and early waking time showed significant positive correlations with physical activity level. Ushapana (Intake of water in early morning) will lead to flush out all impurities and help to prevent Sauchakarma (Voidings of from diseases. excrements) balance physiological systems. Dantadhavana (cleaning of teeth) and

Jivhanirlekhana (cleaning of tongue) increase the sensation and reduce plaque levels in teeth [13] Anjana (application of collyrium) increases the eye sight and Nasya (nasal cleansing) leads for stimulation of the hormones and increase the effect in neuro vascular and neuro endocrine levels. Gandusha, Kavala (mouth gargles) enhances the senses, maintains clarity, brings about a feeling of freshness, and invigorates the mind. Abhyanga (Massage), According to the evidences, Snana (Bath) is a therapeutic preventive and rejuvenating ritual for the body, mind and soul [14]. Vyayama (Exercise) helps to physical development luster and increase the hunger by decreasing physical debility. Udvarthana which leads to detoxification and Ahara (diet) concepts in Ayurveda gives lusture, mental vigor and strength.

Considering the world trends, the most common burden of diseases or morbidities due to alcohol intoxication are Malignant neoplasms, Diabetic mellitus, alcohol use disorders, epilepsy, cardiovascular diseases and digestive diseases which led to increase the mortality rates [15]. According to Ayurveda, the food which are advised to consume daily are Shashtika-shali (rice grown in 60 days), Godhuma (wheat), Yava (barley), Mudga (green gram), Saindhava (rock salt), Amalaki (Emblica officinalis), Antarikshajala or Divyodaka (rain water), Ghrita (ghee), cow milk, Madhu (honey), JangalaMamsa (meat of animals from arid land) can be correlated as balance diet [16,17]. That balance diet helps to regulate the body functions by giving the proper nutrition, complexion, vitality and happiness. Most of these morbidities can categorized under non communicable diseases and the diet and regular exercise will maintain the healthy life styles of the patients of Madatyaya as well as reduce the morbidities.

### 5. CONCLUSION

Effect of Madatyaya which has been mentioned in Ayurveda can be correlated with the Alcohol intoxication in Modern Science and in both concepts it is revealed that Alcohol harms the person and gives the complications by affecting the central nervous system. Further, the concepts of Dinacharaya are can to be implicated for positive health to manage morbidities due to alcoholism and Madatvava. Thus the objectives of this study was to study on Madathya with special reference to Alcoholism and applicability of concept of Dinacharya for managing morbidities occurred due to Alcoholism

### NOTE

The study highlights the efficacy of "Ayurveda" which is an ancient tradition, used in some parts of India. This ancient concept should be carefully evaluated in the light of modern medical science and can be utilized partially if found suitable.
